

Runnable

Runnable

CASUAL.LinkLauncher

```
classDiagram
    class Runnable1[Runnable]
    class Runnable2[Runnable]
    class CASUAL_LinkLauncher[CASUAL.LinkLauncher]
    CASUAL_LinkLauncher --> Runnable1
    CASUAL_LinkLauncher --> Runnable2
```

The diagram illustrates a class hierarchy where the `CASUAL.LinkLauncher` class inherits from two separate `Runnable` classes. A horizontal line connects the two `Runnable` boxes, with a vertical line descending from its center to the `CASUAL.LinkLauncher` box. Arrows point from the `CASUAL.LinkLauncher` box up to each `Runnable` box, indicating the direction of inheritance.
