

JFrame

JFrame

CASUAL.CASUALJFrame

```
classDiagram
    class JFrame1["JFrame"]
    class JFrame2["JFrame"]
    class CASUALJFrame["CASUAL.CASUALJFrame"]
    CASUALJFrame --> JFrame1
    CASUALJFrame --> JFrame2
```

The diagram illustrates a class hierarchy. At the bottom is a box labeled 'CASUAL.CASUALJFrame'. Two arrows originate from the top of this box and point upwards to two separate boxes at the top, both labeled 'JFrame'. The left 'JFrame' box is positioned to the left of the 'CASUAL.CASUALJFrame' box, and the right 'JFrame' box is positioned to the right of it. The arrows indicate that 'CASUAL.CASUALJFrame' inherits from both 'JFrame' instances.
